About This Game

InCell is an action/racing game with a bit of strategy and science thrown into the mix in a rare and highly unusual microworld of the carefully recreated human cell. This is the right project to start your acquaintance with VR or receive new VR impressions.

The game is focused on Virtual Reality but you can play just fine without a set.

Ready steady go!

Thanks to all robot-gods out there we will not take this journey alone - our humble (with a tiny control-everyone mania) assistant is waiting for us (she is so sweet, isn't she?). **The Most Excellent Assistant Zero-Seven** (she said that humans may refer to her simply as 'Your Highness'). So the player's task is to impress TMEAR07 with experiment on volunteer to unlock new healing technology for humanity. The problem is she doesn't believe in that possibility because humans are simple and illogical (and she is genius... as always).

To cure our volunteer Mrs. Jane Smith and impress TMEAR07 players must select the right way through the objects (organelles) to the cell's nucleus and do their best in innovative radial racings between selected objects. Each object provides unique abilities to improve racing params or to protect cell with different strategies.

How is it going inside the cell?

Getting closer to understanding cell structure and organelles functions (which are similar to the real functionality of the organelles) players will improve their skills and will have a chance to impress completely suspicious The Most Excellent Assistant Zero-Seven (who knows why is she so much aware of the other six Excellent Assistant Robots disassembling...).

One old and wise robot (he is still remember his 386 childhood) said that it's a bad idea to make this kind of girl-robot sad...

Features

- Playable with VR (control the movement with your head only, or use keyboard and joystick).
- Solve the riddle of TMEAR07, find out why doesn't she believe in the humanity (may be it is just robot's bad today or some silicon stuff inside your PC makes she sad)?
- With each new start the cell structure will be generated anew placing the organelles in different locations.
- This game is a perfect opportunity to learn more about cell microstructure, different organelles and their roles in cell vital activity.
- Unlock harder difficulties where the true challenge awaits.

Hot keys

-
- Space - recenter camera position in VR mode
 - M - switch mirroring VR picture on monitor
 - Esc - pause and options menu
 - F5 - hide or show UI
 - F6 - hide or show bathyscaphe
 - F1 - graphics for recommended hardware
 - F2 - graphics for older hardware
 - F3 - decrease rotation speed (highly not recommended, only for experienced VR players)
 - F4 - increase rotation speed (highly not recommended, only for experienced VR players)
 - F7 - reset rotation speed to default

Known issues

- VR on Linux is not yet implemented
- If you are not using gamepad you may want to plug it off to switch game in mouse/keyboard control mode.

If you like easy games with fancy new gen graphics, then this isn't for you, live in the furry skin of the fox trapped in a weird love story.

A little tip is, if you die, when you respawn try to kill all the enemies you can, that way you can earn more score which gets converted in extra lives when you need it!!!. Nice and chill game! :D. Love it Puzzles are semi hard but once u figure it out its like wow im a idiot how did i not get that the first time ^^.

OH MY GOD in the first few seconds i knew this was bad. the controls are unintuitive and if you turn too strongly in any direction (up down left right) the camera will have some sort of spasm and fall miles behind the plane.

the combat would be unimpressive for a ps2 game and even though i know that this supposed to be arcadey and non realistic but there is a fine line between interesting arcadey hadling and just straight up awful design in the control and combat area. this is because:

> there is no bullet drop

> i managed to destroy a hot air balloon from 1500m away (??)

> the AI is... well... lets just say 'questionable'

> you do not want to even see the floor in this game (unrelated but the resolution just amazed me so much i had to comment) to end this, i must say if i was IGN and being payed a lot of money to say this game was good i still wouldn't.

Now this is IGN so that is saying something...

NEVER DOWNLOAD THIS GAME. Worst farming game ever.. Very bad game,or perhaps just for noobs with a.ss need d.ildo^^

I think people who like this games , have problem with s.ex or perhaps helpless with their girlfriend,but perhaps its a therapy for htc vive player who have a small d.ick :). This game is what GTA should be. All in all it was simply boring - almost no interaction possible, no choices to make. Just find the one thing you can klick and bingo! The story is lame, save your time and play something else!

(Front Mission Evolved - Wanzer Pack 3)

Another pair of new Wanzers for \$4. This one is also pretty forgettable, but is more or less required if you want to use a Hover-type Wanzer at endgame in singleplayer, because all of the endgame leg parts are bipedal because ... design decisions, I guess.

I'm not really sure that's worth the four bucks they're asking, but there you go.. Great game, plus you get to make choices about which group you will stay with and who you will kill. Not every beat em up has these kinds of choices to make the game even more interesting! This game is a bunch of fun, you can't go wrong with this one if you like the old school side scrolling games ;). Great game! my favorite TD game ever. Great artwork, and even though there is no voice-overs, the story is good and the map is expansive. Working to the late game feels nice and "grinding" is quick and rewarding. I highly recommend this for people who like TD or light strategy and steampunk! :D. Horrible voice acting of Yuri Khovansky is horrible. I don't like his voice. How much money Khovansky paid to devs?. An enchanting little game. As much as relaxing VR experience wandering through the eyes of a child as it is a fun puzzle game. The devs really captured a heart that's missing from so many narrative driven games.. Besides being bogged down by its slow, clunky control scheme, its unengaging gameplay and its flashy but lifeless visuals, N.E.R.O. handles its story with a few too many clichés, resulting in the passion that was obviously poured into it not quite paying off. Unfortunately, I cannot recommend this game to fans of puzzle games or fans of "walking simulators," since it succeeds in neither genre. Though its story is worth telling, this is not the way it deserved to be told.. It's not a bad game, but there is also nothing to recommend here. There is no single-player campaign, just a training level. It is an online multiplayer game for one-on-one matches, but multiplayer is dead. It is originally a smartphone-game, while there is a "pass&play"-mode for two players on one phone (screen), but forget that on PC when the opponent is not allowed to see the positions of the Assassins. Anyway, if you don't have a friend to play it with the game is pretty useless. I'm also not convinced about the balance between Kings and Assassins. It's a simple and short casual game, look at the playing times, and certainly not worth the money. Can't recommend it for a price above 0,99 cents.
